Green Dot Guiding Principles

Mission

Green Dot's mission is to transform public education in Los Angeles and beyond so every student can graduate prepared for college, leadership and life.

Background

Unique in the nation for a major charter management organization, Green Dot is proving that it can achieve better student outcomes with the same student population, lower per pupil funding than the district and a unionized workforce. We are the leading charter school operator in Los Angeles and one of the top three largest in the nation.

The U.S. Department of Education has featured Green Dot as a national leader in school turnarounds, and we are the only charter school operator in the country to lead the turnaround of a 3,000-plus student high school.

Green Dot's Core Values

Our underlying belief is that all students can go to college. Green Dot's success is rooted in five core values that form the basis of our schools' commitments to their students and guide everything we do.

1. An unwavering belief in all Student's Potential
All students can be successful learners.
2. Passion for Excellence
All challenges can be overcome through commitment and passion.
3. Personal Responsibility
We take responsibility in our lives to drive accountability for our actions.
4. Respect for Others and the Community
We respect others in our daily interactions.
5. All Stakeholders are Critical in the Education Process
We have proven that young adults receive the best education when all stakeholders make a genuine effort to participate in the education process.
