Performance: How well all people are doing in a given county. For example, what is the average graduation rate in Los Angeles County?

Disparity: How well different racial groups in a county are doing compared to each other. For example, are Latinos graduating at the same rate as other groups in Los Angeles County?
Impact: The total population for each county and therefore how many people are affected. For example, how many people live in a county where graduation rates are high, but Black students don’t graduate as often as other racial groups?
